

Prefilled Flush Syringes

The SteriCare Solutions sterile water products provide safe, medical grade saline and water products to clinicians worldwide. These Prefilled Saline Syringes provide the clinician with a high quality, terminally sterile, ready to use solution to enhance patient care and improve clinical workflow while reducing the risk for medication error and inadvertent needlestick injuries.

FEATURES/BENEFITS:

- Low break force construction reduces incidental product waste
- Needle free design eliminates risk of an inadvertent needlestick
- Single use design to help reduce risk of medication errors and contamination
- Distinct and prominent syringe labeling allows for easy identification of syringe size and volume
- Product manufactured and sterilized on site in the U.S.A
- All syringes, including the fluid pathway are terminally sterilized to eliminate risk of solution contamination

Prefilled Saline Syringe Ordering Information:

- All units contain 0.9% USP Sodium Chloride Injection sterile water. Product has been terminally sterilized and individually packaged with a two year shelf life. Product does NOT contain any natural latex. UDI compliant.
