N95 Surgical RESPIRATOR/FACE MASKS

ProGear's NIOSH and FDA approved N95 Surgical Respirator is intended to protect both patients and health care workers from the transfer of microorganisms and airborne particulate materials. Prestige Ameritech has been making N95 respirators in the USA since 2010. These N95 masks fit snugly to the face and conform to many different face shapes, making it easy to breathe and speak.

FEATURES/BENEFITS:

- Made in USA using only American raw materials since 2010
- Snugly conforms to many different face-shapes
- Large filter area allows for easy breathing and speaking
- Stretch-knit headbands enhance wearer comfort
- Cleared by the Food and Drug Administration (FDA) for use as a surgical mask
- Does not contain cellulose
- Does not contain latex
- Cleared for use as a surgical mask by the FDA
- Made in the USA

PRO GEAR N95 SIZING CHART

N95s are intended to be snug, but should not be so tight that they are unusable. Measuring your head just above your ears is the best way to find the size you need:

SMALLER than 22 inches, choose Small/Petite

BETWEEN 22 and 24 inches, choose Regular/Universal

LARGER than 24 inches, the mask will be too tight to wear comfortably and we do not recommend that you purchase our N95s.

MFG#	DESCRIPTION	PACKAGING	BRAND
RP88020	N95 Respirator/Face mask, molded, regular	50 ea/innerbox, 6 innerboxes/ case = 300 ea/case	ProGear
