

DISTRIBUTED BY:

Skin Stapler

Skin staplers are used in wide-range of surgical procedures. They are instrumental in closing up wounds and incisions more quickly and painlessly than stitches and may be used in place of sutures. The Forsure Skin Stapler is preloaded with 35 wide stainless steel staples and offers an angled head which provides clear and easy wound closure.

SKIN STAPLER:

- 35 Wide stainless steel staples
- Preloaded
- Automatic staple application system
- Angled head to provide clear and easy wound closure
- Sharp Staples result in less pain for the patients
- Visible side stapler counter to 35
- Packaged separately with plastic and Tyvek paper
- Sterile/Single use
